

Than Anh Tuan (Fullstack Developer)

Date of birth: 26/04/1998

Phone: 0962934127

Email: thananh tuan2011@gmail.com

SUMMARY

- **About 5 years of professional experience** in designing and developing user interfaces as well as handling software using **Angular+**.
- Build Progressive Web App (PWA) with **Angular**
- Have experience with Book flight tickets for Vietjet air and E-Commerce
- More than 1 year working with Electronjs to build desktop applications on windows and macOS
- Have experience in making architectural design documents (Basic design, Low level design, Detail design, DataBase, SQL Server, MongoDB, MySQL...)
- More than 3 years of experience and knowledge about HTTP Request (Restful API), .Net
- Build chatbot with OpenAI, Gemini
- Google Maps API
- I always keep up to date with new technologies and joining many projects which applying agile process and having daily meetings with customer, on-shore team to estimate and report tasks.
- Have a bachelor's degree in software engineering.
- Have experience working at Dai Phat Solutions company as a Fullstack Developer and senior frontend developer at Bstar Solutions - Galaxy Holdings
- Apply acquired knowledge, try to learn new knowledge to develop better professional skills
- Dedicated developer focused on completing work quickly to consistently exceed targets.
- Reliable team member accustomed to taking on challenging tasks.
- Ability to learn and apply new technology quickly.
- Time Management: Good.
- Teamwork: Good.

TECHNICAL SKILLS

- **Programming Languages:** HTML, CSS (LESS, SCSS), Tailwind CSS, Javascript, Typescript
- **Framework:** Nestjs, Angular +, Nodejs, Electronjs, .NET, React
- **Database:** HTTP Request (Restful API), MongoDB, SQL Server, MySQL, Postgresql
- **Office:** Microsoft, Excel, Power Point.
- **Others:** Docker, Kafka, Firebase, WebRTC, Redis, RabbitMQ, SignalR, Websocket, Github, GitLab, Oauth, Azure, Jenkins, Agile/Scrum.

EDUCATION

- **Ho Chi Minh City University of Food Industry – Major: Information technology – Software technology**
- **Graduated with honors (3.7/4.0 GPA)**

WORKING EXPERIENCE

❖HTECOM Technology

FullStack Developer, Booking (Remote FullTime) (12/2025 - Present)

- **Description:** The Bus Ticket Booking System is a platform that helps customers quickly and conveniently search, book, and pay for bus tickets online. The system allows for real-time management of routes, schedules, seats, fares, and orders, helping bus companies optimize operations and enhance customer experience. CMS for Admin is a central management system that allows administrators to manage all data and operations of the bus ticket booking system, including routes, trips, vehicles, fares, bookings, and users, helping to operate the system efficiently and accurately.
- **Team size:** 6 members
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Angular frameworks.
 - + Implement responsive design and ensure cross-browser compatibility using Bootstrap and Primeng UI
 - + Design, develop and optimize backend services using .NET Core.
 - + Build and manage APIs (RESTful / Postgresql) to communicate with frontend and external systems.
 - + Design database structure (Postgresql), write efficient queries and perform system performance optimization.
 - + Participate in business requirement analysis with BA, build technical specifications.
 - + Implement security, authentication and authorization solutions such as JWT, OAuth2
 - + Write clean, maintainable and efficient code
 - + Continuously learn and implement the latest best practices and standards in TypeScript, Angular and Tailwind
 - + Stay current with emerging trends in front-end development and suggest improvements and innovative solutions
 - + Write unit, integration, and end-to-end tests to ensure the robustness and reliability of applications.
 - + Debug and resolve issues reported by QA and end-users promptly.
 - + State management using Signal.
- **Technologies:**
 - + Typescript
 - + Angular 20
 - + Primeng UI
 - + Tailwind css
 - + Postgresql 16
 - + .Net 9.0

Frontend Developer (Remote FullTime) (08/2025 - Present)

- **Description:** Ninh Binh Provincial Cultural Database is a centralized information system, built to store, manage and comprehensively exploit data related to tangible and intangible cultural heritage, historical relics, scenic spots, festivals, customs, traditional craft villages and typical local cultural values. The CMS (Content Management System) of the Portal is designed to centrally manage all content and data displayed on the website. The system allows flexible content management (adding, editing, deleting and updating articles, news, events, images, videos, documents), and supports user authorization with many different account groups such as administrators, editors, collaborators. The CMS also allows specialized data management (heritage, culture, tourism, policies, etc.) according to a standardized structure, integrating multimedia (maps, 360° images, video clips, photo libraries), along with advanced search and lookup tools to help users easily access information. In addition, the system is scalable and can connect to external platforms such as APIs, national databases or smart tourism systems.
- **Team size:** 15 members
- **Responsibilities:**
 - + Design and implement user interfaces using TypeScript and Angular v20

- + Ensure the application's look and feel aligns with design specifications using Tailwind CSS.
- + Develop reusable UI components to enhance development efficiency.
- + Integrate front-end components with RESTful APIs and other backend services.
- + Collaborate with backend developers to define data requirements and ensure seamless data flow.
- + Write unit tests and participate in end-to-end testing to ensure code quality and functionality.
- + Participate in business requirement analysis with BA, build technical specifications.
- + Implement security, authentication and authorization solutions such as JWT, OAuth2
- + Integrate the system with third-party services such as google map api
- + Review code and optimize.
- **Technologies:**
 - + Typescript
 - + Angular 20
 - + Tailwind
 - + Rxjs
 - + PrimeNG UI
 - + Ant design
 - + Google Map

❖ Innologiciel

FullStack Developer, InnoBook (Remote FullTime) (11/2024 – 07/2025)

- **Description:** InnoBook is an accounting and financial management software for small businesses and freelancers, helping to create invoices, manage expenses, track time, and take payments online. With a friendly interface and detailed financial reports, InnoBook helps optimize workflow and make effective business decisions.
- **Team size:** 4 members (Team leader)
- **Responsibilities:**
 - + Design and implement user interfaces using TypeScript and Angular.
 - + Ensure the application's look and feel aligns with design specifications using Tailwind CSS.
 - + Develop reusable UI components to enhance development efficiency.
 - + Integrate front-end components with RESTful APIs and other backend services.
 - + Collaborate with backend developers to define data requirements and ensure seamless data flow.
 - + Write unit tests and participate in end-to-end testing to ensure code quality and functionality.
 - + Conduct code reviews and enforce coding standards and best practices.
 - + Design, develop and optimize backend services using .NET Core.
 - + Build and manage APIs (RESTful / PostgreSQL) to communicate with frontend and external systems.
 - + Design database structure (PostgreSQL), write efficient queries and perform system performance optimization.
 - + Participate in business requirement analysis with BA, build technical specifications.
 - + Implement security, authentication and authorization solutions such as JWT, OAuth2
 - + Integrate the system with third-party services such as payment, email, notification
 - + Review code and optimize.
- **Technologies:**
 - + Typescript
 - + Angular 18
 - + Tailwind
 - + .NET 8
 - + PostgreSQL 16
 - + Rxjs
 - + Syncfusion UI

❖ Bstar solutions

Frontend Developer, SkyJoy (07/2024 – 11/2024)

- **Description:** Vietjet Air's frequent flyer program brings joy to each member through the opportunity to accumulate and redeem endless reward points in Vietnam and around the world.
- **Team size:** 10+ members
- **Responsibilities:**
 - + Design and implement user interfaces using TypeScript and Angular.
 - + Ensure the application's look and feel aligns with design specifications using Tailwind CSS.
 - + Develop reusable UI components to enhance development efficiency.
 - + Build webview for mobile app.
 - + Upgrade angular 18 from angular 16.
 - + Build CMS ticket price configuration.
 - + Integrate front-end components with RESTful APIs and other backend services.
 - + Collaborate with backend developers to define data requirements and ensure seamless data flow.
 - + Write unit tests and participate in end-to-end testing to ensure code quality and functionality.
 - + Conduct code reviews and enforce coding standards and best practices.
- **Technologies:**
 - + Typescript
 - + Angular
 - + Tailwind
 - + Ant design
 - + Rxjs

❖ DPS solutions

Fullstack Developer, Contract management, revenue and expenditure (03/2021 – 07/2024)

- **Description:** Build a revenue and expenditure contract management system in the enterprise
- **Team size:** 3 members (Team leader)
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Angular frameworks.
 - + Design, develop and optimize backend services using Nodejs.
 - + Build and manage APIs (RESTful / MySQL) to communicate with frontend and external systems.
 - + Design database structure (MySQL), write efficient queries and perform system performance optimization.
 - + Implement responsive design and ensure cross-browser compatibility using Bootstrap and Material UI
 - + Write clean, maintainable and efficient code
 - + Continuously learn and implement the latest best practices and standards in TypeScript, Angular and Bootstrap
 - + Stay current with emerging trends in front-end development and suggest improvements and innovative solutions
 - + Write unit, integration, and end-to-end tests to ensure the robustness and reliability of applications.
 - + Debug and resolve issues reported by QA and end-users promptly.
 - + Review code and optimize.
- **Technologies:**
 - + Typescript
 - + Angular 15
 - + Material UI

- + MySQL
- + Nodejs (Sequelize)

E-commerce (02/2024 – 06/2024)

- **Description:** Build a clothing sales system, warehouse management. Customers can buy products. Payment via Vnpay or OnePay. Apply Chatbot functions to support customers. Admin can manage inventory, quantity, orders, chart revenue, export reports
- **Team size:** 3 members
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Angular frameworks.
 - + Implement responsive design and ensure cross-browser compatibility using Bootstrap and Material UI
 - + Design, develop and optimize backend services using .NET Core.
 - + Build and manage APIs (RESTful / SQL Server) to communicate with frontend and external systems.
 - + Design database structure (SQL Server), write efficient queries and perform system performance optimization.
 - + Participate in business requirement analysis with BA, build technical specifications.
 - + Implement security, authentication and authorization solutions such as JWT, OAuth2
 - + Write clean, maintainable and efficient code
 - + Continuously learn and implement the latest best practices and standards in TypeScript, Angular and Bootstrap
 - + Stay current with emerging trends in front-end development and suggest improvements and innovative solutions
 - + Write unit, integration, and end-to-end tests to ensure the robustness and reliability of applications.
 - + Debug and resolve issues reported by QA and end-users promptly.
- **Technologies:**
 - + Typescript
 - + Angular 14
 - + Material UI
 - + Chart
 - + SQL 2022
 - + .Net
 - + SEO (Server-Side Rendering (SSR) with Angular Universal)

ChatBot AI (12/2023 – 02/2024)

- **Description:** Build a chatbot to help answer related questions. The data is trained
- **Team size:** 1 member
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Nextjs frameworks.
 - + Use chatgpt technology to enhance user experience
 - + Write clean, maintainable and efficient code
 - + Stay current with emerging trends in front-end development and suggest improvements and innovative solutions
 - + Write unit, integration, and end-to-end tests to ensure the robustness and reliability of applications.
 - + Debug and resolve issues reported by QA and end-users promptly.
- **Technologies:**
 - + Typescript
 - + OpenAI

- + Langchain
- + Nextjs
- + Pinecone
- + Vector DB
- + Chroma
- + Docker

Frontend Developer, Micro FE (03/2023 – 11/2023)

- **Description:** Micro Frontends will decompose these applications into combinations of features, each of which can be developed by an independent team. Deployed in jeeplatform.
- **Team size:** 4 members
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Angular frameworks.
 - + Implement responsive design and ensure cross-browser compatibility using Bootstrap and Material UI
 - + Write clean, maintainable and efficient code
 - + Continuously learn and implement the latest best practices and standards in TypeScript, Angular and Bootstrap
 - + Stay current with emerging trends in front-end development and suggest improvements and innovative solutions
 - + Write unit, integration, and end-to-end tests to ensure the robustness and reliability of applications.
 - + Debug and resolve issues reported by QA and end-users promptly.
- **Technologies:**
 - + Typescript
 - + Angular 12
 - + Material UI
 - + Angular-architect

Build chat lib and publish to npm (12/2022 – 06/2023)

- **Description:** Publish the library to npm so many apps can use it
- **Team size:** 1 member
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Angular frameworks.
 - + Use chatgpt technology to enhance user experience
 - + Write clean, maintainable and efficient code
 - + Stay current with emerging trends in front-end development and suggest improvements and innovative solutions
 - + Write unit, integration, and end-to-end tests to ensure the robustness and reliability of applications.
 - + Debug and resolve issues reported by QA and end-users promptly.
- **Technologies:**
 - + TypeScript
 - + JavaScript
 - + NPM
 - + Angular lib

The chat, team, work application is in the jeeplatform ecosystem with many functions (03/2022 – 11/2022)

- **Description:** Build a chat application between employees to create tasks (work in chat), create meetings using zoom or msTeam, send files, images, videos, stickers, tag names, encrypt messages and notifications

- **Team size:** 5 members
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Angular frameworks.
 - + Implement responsive design and ensure cross-browser compatibility using Bootstrap and Material UI
 - + Write clean, maintainable and efficient code
 - + Continuously learn and implement the latest best practices and standards in TypeScript, Angular and Bootstrap
 - + Design, develop and optimize backend services using .NET Core.
 - + Build and manage APIs (RESTful / SQL Server) to communicate with frontend and external systems.
 - + Design database structure (SQL Server), write efficient queries and perform system performance optimization.
 - + Participate in business requirement analysis with BA, build technical specifications.
 - + Implement security, authentication and authorization solutions such as JWT, OAuth2
 - + Stay current with emerging trends in front-end development and suggest improvements and innovative solutions
 - + Write unit, integration, and end-to-end tests to ensure the robustness and reliability of applications.
 - + Debug and resolve issues reported by QA and end-users promptly
- **Technologies:**
 - + TypeScript
 - + JavaScript
 - + Angular 11
 - + Material UI
 - + Websocket
 - + HTTP Request (Restful API)
 - + Sql Server

Build desktop applications with Electron on windows and macos (02/2022 – 11/2022)

- **Description:** Desktop application on windows and macos, notify, automatically start the application when starting the computer, automatically update version when there is a new release.
- **Team size:** 1 member
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Angular frameworks.
 - + Using electronjs to package and build desktop app.
 - + Implement responsive design and ensure cross-browser compatibility using Bootstrap and Material UI
 - + Write clean, maintainable and efficient code
 - + Continuously learn and implement the latest best practices and standards in TypeScript, Angular and Bootstrap
 - + Stay current with emerging trends in front-end development and suggest improvements and innovative solutions
 - + Write unit, integration, and end-to-end tests to ensure the robustness and reliability of applications.
 - + Debug and resolve issues reported by QA and end-users promptly.
- **Technologies:**
 - + TypeScript
 - + JavaScript
 - + Angular 11
 - + Material UI
 - + Electronjs
 - + Electron builder
 - + Nodejs

- + Electron Notification

Internal social network (02/2021 – 12/2021)

- **Description:** Internal social networks are used as a "platform" to develop and use applications that support operational and decision-making processes within the enterprise. With the traditional method, all information and documents must be printed in documents and approved in hard copies, stored in the business's filing cabinet, and created posts with pictures, files, announcements, and displays. Express emotions, chat integrated from npm chat lib built in the system.
- **Team size:** 1 member
- **Responsibilities:**
 - + Build and enhance web applications using TypeScript and Angular frameworks.
 - + Design and develop interactive, user-friendly, and responsive web applications using Angular framework and best practices.
 - + Write clean, efficient, and maintainable code using TypeScript, adhering to coding standards.
 - + Translate UI/UX designs and wireframes into functional Angular components.
 - + Implement features using JavaScript and leverage Angular features like dependency injection, routing, and services.
 - + Integrate with back-end APIs to fetch and manipulate data.
 - + Testing and debugging.
 - + Conduct unit and integration tests to ensure code quality and functionality.
 - + Debug and troubleshoot frontend issues effectively.
 - + Write clear and concise documentation for code components.
- **Technologies:**
 - + TypeScript
 - + Angular 12
 - + Material UI
 - + Websocket
 - + SignalR
 - + Sql Server
 - + .NET, Json, HTTP Request (Restful API) Notifications

Mandofashion (6/2020 – 12/2020)

- **Description:** A modern, responsive fashion e-commerce web application built using **ASP.NET MVC (Model-View-Controller)** architecture in **C#**. The application allows users to browse fashion products, view detailed product pages, register/login, and securely place orders.
- **Team size:** 2 members
- **Responsibilities:**
 - + Build and enhance web applications using ASP.NET MVC.
 - + Design and develop interactive, user-friendly, and responsive web applications
 - + Write clean, efficient, and maintainable.
 - + Translate UI/UX designs
 - + Integrate with back-end APIs to fetch and manipulate data.
 - + Testing and debugging.
 - + Conduct unit and integration tests to ensure code quality and functionality.
 - + Debug and troubleshoot frontend issues effectively.
 - + Write clear and concise documentation for code components.
- **Technologies:**

- + ASP.NET MVC (C#), Entity Framework
- + Razor Views, Bootstrap, jQuery, HTML/CSS
- + Sql Server
- + .NET, Json, HTTP Request (Restful API) Notifications

Trello (2/2020 – 6/2020)

- **Description:** The project simulates the Trello application, allowing users to create work boards, lists, work cards and drag and drop to organize. The system supports teamwork, delegation of authority and intuitive work progress tracking.
- **Team size:** 2 members
- **Responsibilities:**
 - + Build and enhance web applications using Reactjs.
 - + Design and develop interactive, user-friendly, and responsive web applications
 - + Write clean, efficient, and maintainable.
 - + Translate UI/UX designs
 - + Integrate with back-end APIs to fetch and manipulate data.
 - + Testing and debugging.
 - + Conduct unit and integration tests to ensure code quality and functionality.
 - + Debug and troubleshoot frontend issues effectively.
 - + Write clear and concise documentation for code components.
- **Technologies:**
 - + Reactjs
 - + Nodejs
 - + Express
 - + Mysql
 - + HTTP Request (Restful API)
